How Does SitSmart Work?	TILTS	CUPS	FLOATS
PATENTED ACTIVE STABILIZATION™ SYSTEM TRANSFORMS YOUR POSTURE FROM THE BOTTOM UP  SitSmart tilts your hips upright into a neutral position, shifting your center of gravity forward to move pressure and strain away from your lower back.	 WITHOUT - PAIN WITH - RELIEF SitSmart cups your gluteus muscles so they cannot flatten against the seat under your weight. This stops the tightening of back muscles and prevents pain.	 SPACE BETWEEN YOU & SEAT Like a shock absorber for your spine, SitSmart lifts your pelvis above the sitting surface to provide you with total comfort while you sit.
